

Hiba Shareefa mk

Python Frontend Developer

✉ hibashareefamk@gmail.com ☎ 7736949084 📍 Manjeri, Malappuram 🔗 LinkedIn 🐙 GitHub

SUMMARY

Frontend Engineer specializing in **React.js** and modern JavaScript ecosystems to build high-performance, responsive web applications. Proven expertise in designing modular component architectures, implementing global state management with **Redux Toolkit**, and consuming complex RESTful and WebSocket APIs flawlessly. Passionate about clean code, optimizing client-side performance, and collaborating closely with design teams to deliver intuitive, user-centric interfaces.

TECHNICAL SKILLS

- **Frontend Libraries & Frameworks:** React.js, Redux Toolkit, WebRTC.
- **Languages:** JavaScript (ES6+), HTML5, CSS3, SCSS, Python.
- **UI Frameworks & Styling:** Tailwind CSS, Bootstrap, Styled Components.
- **API & State Integration:** RESTful APIs, WebSockets, Axios, JWT Handling.
- **Tools & DevOps:** Git, GitHub, Postman, Vercel, Render, Docker.
- **Backend & Infrastructure (Move to bottom):** Django, FastAPI, PostgreSQL

PROFESSIONAL EXPERIENCE

Bridgeon Solutions LLP

06/2025 – Present | kozhicode,kerala

Python Full-Stack Developer (Intern)

- Architected and deployed 4 full-stack applications (2 major, 2 minor) utilizing Django, FastAPI, and React.js, taking ownership of the end-to-end software development lifecycle from system design to production.
- Actively contributed to Agile / Scrum workflows, including sprint planning and daily stand-ups, ensuring efficient team coordination and timely feature delivery.
- Refined technical communication and teamwork skills through regular project presentations, collaborative code reviews, and cross-functional problem solving.

PROJECTS

StockSphere (Nexus ERP) - Enterprise Resource Planning

- **Developed a high-performance interactive operational dashboard** using **React.js** and **Redux Toolkit**, establishing clean global state structures for complex inventory mapping.
- **Formulated a fluid, fully responsive layout** utilizing **Tailwind CSS** components to ensure flawless scannability and access for field staff across mobile and desktop devices.
- **Built a low-latency real-time workspace client** by establishing stateful **WebSocket connections** to the backend, enabling live multi-role chat windows and instant, pop-up stock warnings.
- **Integrated secure token mechanics on the frontend**, implementing safe client-side storage routines, **JWT token rotation interceptors**, and route guards to enforce multi-role navigation boundaries.

Lullaby – Advanced Full-Stack E-Commerce Platform

- **Formulated fluid multi-step checkout streams and product catalogs** in React, optimizing component re-rendering to handle thousands of unique active display items smoothly.
- **Designed an interactive product variant selector** enabling shoppers to dynamically select parameters like size and color combinations while maintaining instant state updates for item availability.
- **Consumed complex RESTful endpoints cleanly**, integrating global state frameworks to handle persistent shopping cart updates, wishlists, and secure asynchronous payload delivery.

Student Learning Management System (SLMS)

- **Designed a responsive, multi-role user interface** from scratch using semantic HTML5 and Tailwind CSS components, guaranteeing structural fluidity across dynamic views.
- **Engineered an interactive attendance view dashboard** allowing students to run multi-table date-range filters to immediately render seasonal metrics on the client end.
- **Crafted clean dynamic forms and validation inputs** to ensure frictionless registration pipelines for separate student and mentor profile creation modules.
