

Hiba Shareefa mk

PYTHON FULL STACK DEVELOPER

✉ hibashareefamk@gmail.com ☎ 7736949084 📍 Manjeri, Malappuram 🔗 LinkedIn 🐙 GitHub

SUMMARY

Backend Engineer specializing in Python (Django, Django REST Framework, and FastAPI) with a proven track record of architecting scalable microservices architectures and asynchronous processing pipelines. Skilled in database optimization, real-time networking via WebSockets, and managing server-side security. Passionate about building robust APIs, improving query efficiency, and deploying production-ready backend infrastructure.

TECHNICAL SKILLS

- **Backend Frameworks:** Django, FastAPI, Django REST Framework (DRF), Django Channels (WebSockets).
- **Asynchronous & Real-time Systems:** Celery, Celery Beat, Redis.
- **Databases:** PostgreSQL, Redis, SQLite.
- **DevOps & Architecture:** Microservices, Docker, AWS (EC2, RDS).
- **Testing & Tools:** Postman, Swagger/OpenAPI, Git, GitHub
- **Frontend & Core Languages (Move to bottom):** Python, JavaScript, HTML5, CSS3, Tailwind CSS.

PROFESSIONAL EXPERIENCE

Bridgeon Solutions LLP

06/2025 – Present | kozhicode,kerala

Python Full-Stack Developer

- Architected and deployed 4 full-stack applications (2 major, 2 minor) utilizing Django, FastAPI, and React.js, taking ownership of the end-to-end software development lifecycle from system design to production.
- Actively contributed to Agile / Scrum workflows, including sprint planning and daily stand-ups, ensuring efficient team coordination and timely feature delivery.
- Refined technical communication and teamwork skills through regular project presentations, collaborative code reviews, and cross-functional problem solving.

PROJECTS

StockSphere (Nexus ERP) - Enterprise Resource Planning

- **Architected a containerized Microservices Architecture** using **Docker Compose** to cleanly isolate backend core logic (**Django**) and high-performance routing engines (**FastAPI**) behind an **Nginx** API Gateway.
- **Optimized asynchronous execution** by configuring **Celery** and **Celery Beat** over a **Redis** message broker to smoothly handle background cron jobs, automated inventory updates, and multi-branch data logging.
- **Implemented low-latency, real-time networking** using **Django Channels (WebSockets)** and **Redis** to synchronize concurrent multi-branch user arrays and stream immediate critical stock warnings.
- **Enforced robust backend security and reliability** by deploying custom middleware, strict HTTP status formatting, **JWT token rotation**, and atomic database transactions to eliminate race conditions.

Lullaby - Advanced Full Stack E- Commerce Platform

- **Engineered a decoupled, high-performance architecture** seamlessly connecting a secure **Django REST Framework (DRF)** backend API to a responsive, optimized **React.js** frontend application.
- **Implemented a multi-layered authentication engine** featuring stateful access/refresh token rotation, automated SMTP-based account recovery pathways, and secure state validation.
- **Designed a complex, normalized relational database** to handle multi-variant matrices (dynamic parameters mapping product size and color variations) while enforcing strict database integrity constraints for real-time stock tracking.
- **Formulated clean data persistence routines** using **PostgreSQL**, leveraging selective query prefetches (`select_related/prefetch_related`) and index optimizations to drastically slash API payload latency.
- **Secured cloud data communication channels** against common vulnerabilities by enforcing rigid **CORS/CSRF protection controls** and strict data serialization protocols.

SLMS -Student Learning Management System

- **Developed a dynamic, multi-role academic platform** using **Django** and **PostgreSQL**, cleanly structuring distinct permissions, workflows, and customized dashboards for both students and mentors.
- **Engineered an advanced Attendance Tracking Module** enabling instructors to record data logs dynamically, while providing students with an interactive query interface to sort, calculate, and analyze attendance percentages by specific dates or academic terms.

EDUCATION

Bachelor of Commerce (B.Com Cooperation)
Calicut university
